How to solve a Cryptogram

- Each puzzle is a saying in code: every letter has been swapped for another letter.
- The same code letter always stands for the same real letter, and no letter stands for itself.
- Write the real letter on the line above each code letter. Grey letters are free hints to start with.
- Short words help: a one-letter word is usually A or I, and THE and AND are common.
- The answers are at the back of the book.

Cryptogram 1

Y E K N Z J G G T V Y I

D Z A W V F K X Y J

M Z F W G .

Cryptogram 2
