How to solve a Word Search

- Every word in the list under the grid is hidden in the letters above it.
- Words run in straight lines: across, down or on a diagonal. In harder puzzles they can also run backwards.
- When you find a word, circle it in the grid and cross it off the list. Words can cross and share letters.
- Spaces and punctuation in a word are left out of the grid. Each word appears exactly once.
- The answers are at the back of the book.
